

How the Fun Match RUN ORDER works and when do you walk...

On the following pages you will find the run order listed for Saturday and Sunday by height groupings.

Find the grouping your dog is entered in. If you are in multiple classes and only have one dog you will only have to walk one course at a time. If you have multiple dogs in different height groupings—then you will need to walk both courses before we start.

If you have just one dog and your dog's height is in the first grouping for the arena—then you only need to walk in the arena first. If your dog is in the first grouping on the lawn—then you walk that course first.

By 9AM we will start running in each ring with the groupings as listed. We will go through all the dogs in the first height, followed by the next height, etc. until all dogs have done at least one run and then start over again through the heights until all are completed.

Example... First group in Arena is 16/20—we will run through all the dogs in the 16 inch group at least once and then move on to the 20's and run them all at least once—and continue to do this until all runs are completed. **Once all runs are completed for this grouping and the grouping outside is also completed—then we will have another walk through and the two groupings will change rings and follow the run order listed for each ring by day.**

We do not plan breaks for lunch, so that we can keep things moving.

If you cannot stay for all your runs—please let the gate know so they can cross you off the run order.

If you have more than 3 runs in a single class for your dog, please check with the gate steward about how they may accommodate more runs for your dog within a jump height run through.

Please read through all the notes about the amount of time you can spend on the course and other info. and rules.

Thanks!
